SUMMARY

Full Stack Web Developer bringing a varied academic background including programming, music studies, and health sciences. Attending the University of Utah's Coding Bootcamp has helped to cultivate proficiency in the use of coding languages such as JavaScript, CSS, HTML, Node.js, and React. Additionally, programs such as Unity, Blender, and GIMP also contribute to a base of knowledge which assists in creating innovative projects. Working with groups has been a mainstay of my education which has been applied as a student and as a music instructor teaching middle and high school students at a nonprofit organization. While collaborating with others, thoughtfulness and diligence are key attributes that I contribute throughout any project.

TECHNICAL SKILLS

- **Languages**: JavaScript, jQuery, CSS3, HTML5
- **Applications**: Visual Studio Code, Blender, Unity
- **Tools**: Bootstrap, GIMP, Node, MySQL, MongoDB

PROJECTS

My Practice Companion **| https://github.com/Kayvonk/MyPracticeCompanion**
